EXPLANATIONS OF REGULAR STATISTICAL TABLES.

General imports.—The regular statement of imports of merchandise, by articles and countries, in this publication is what is termed the statement of *general imports*, embracing imported articles entered for immediate consumption on arrival and articles entered for warehouse, as distinguished from special imports, which embrace imports entered for immediate consumption and withdrawals from warehouse for consumption.

The statement of *general imports* and the statement of *imports entered for consumption* for any period will differ to the extent that the value of *entries for warehouse* for the period differs from the value of *withdrawals from warehouse for consumption.* The term "*entry for consumption*" is the technical name of the import entry made at the custom-house, and does not imply that the goods have been actually consumed, but simply that they have been delivered into the custody of the importer and that the duties have been paid on the dutiable portion.

The values of articles imported since August 1, 1890, are governed by the provisions of section 19 of the act of June 10, 1890, which prescribes that the values of imported merchandise subject to ad valorem rates of duty shall be "the actual market value or wholesale price of such merchandise as bought and sold in usual wholesale quantities at the time of exportation to the United States in the principal markets of the country from whence imported and in the condition in which such merchandise is there bought for exportation to the United States or consigned to the United States for sale, including the value of all cartons, cases, crates, boxes, sacks, and coverings of any kind, and all other costs, charges, and expenses incident to placing the merchandise in condition ready for shipment to the United States."

Domestic exports.—The regular statement of domestic exports, by articles and countries, in this publication exhibits the exports of domestic products or manufactures, also exports of commodities of foreign origin which have been changed from the form in which they were imported or enhanced in value by further manufacture in the United States, such as sugar refined in this country from imported raw sugar, flour ground from imported wheat, and articles, utensils, etc., made from imported materials. The value of exports of domestic merchandise is their value at the time of exportation in the ports of the United States whence they are exported.

Foreign exports.—The regular statement of foreign exports, by articles, in this publication, sometimes called "reexports," exhibits exports of foreign merchandise which had been imported. The value of such commodities exported "from warehouse" is their import value; the value of such commodities exported "not from warehouse," comprising free goods mainly, is the value at the ports of the United States whence they are exported.

Warehoused merchandise.—The regular statement of articles remaining in warehouse in this publication exhibits imported merchandise in bonded warehouses. This merchandise has already appeared in the statement of *general imports*. The official values of the articles therein represented are the same as the *import values*.

Tonnage tables.—In the tables of tonnage movement in American foreign trade the tonnage is stated in net tons of 100 cubic feet carrying space after the prescribed allowances are made for crew space, engine space, etc.

Weights.—In all tables published by the Bureau the ton weight is 2,240 pounds and the hundredweight is 112 pounds, unless indicated otherwise.

Customs districts.—Statements of imports, exports, and tonnage movement are shown by customs districts, which have a certain prescribed limit of territory with a port of entry. The customs districts having the port of entry with name different from that of the customs district are the following:

CHANGE IN CLASSIFICATION OF IMPORTS AND EXPORTS.

The summary of imports and exports of the United States presented on page 6 is a modification of that formerly utilized, the change having become advisable by reason of changes in the character of the commerce since the adoption of the former classification.

The old classification of exports into the great groups, products of agriculture, manufactures, mines, forests, and fisheries was adopted thirty-six years ago, when the United States was chiefly a producer and exporter of crude products, the exports of manufactures at that time being but about one-tenth as great as to-day. The old classification of imports was adopted twenty years ago, when the classes of articles forming the bulk of the imports also differed materially from those of to-day.

The two old classifications of imports and exports differed so widely that they were not comparable one with the other in attempts to analyze the general trade movements into and out of the country. Meanwhile the principal European nations have adopted classifications adjusted to present conditions of trade and differing materially from those utilized in the United States, thus rendering difficult a comparison of our own trade figures by great groups with those of the leading European countries. Still another and equally important reason for readjusting the old grouping is the fact that the census classification of manufactures includes under that term many articles not classed as manufactures by the Bureau of Statistics, thus rendering difficult, under the old classification, a comparison of the manufactures exported with the census figures of manufactures produced. By the new classification, however, such comparison is practicable.

The new classification, which is applied to both imports and exports, is as follows:

A.—*Foodstuffs in crude condition, and food animals.*
B.—*Foodstuffs partly or wholly prepared.*
C.—*Crude materials for use in manufacturing.*
D.—*Manufactures for further use in manufacturing.*
E.—*Manufactures ready for consumption.*
F.—*Miscellaneous.*

The principal articles forming the first group, "Foodstuffs in crude condition, and food animals," are wheat, corn, rice, and other food grains; animals, except horses and mules; coffee, tea, and cacao in natural state; eggs; fruits in natural state; fresh fish; vegetables and spices in the natural state.

The principal articles forming the second group, "Foodstuffs partly or wholly prepared," are flour, meal, and preparations for table food; fish prepared or canned; fruits dried, preserved, or canned; meats and dairy products; olive and cotton-seed oil intended for food; wines, liquors, and distilled spirits; sugar and molasses; canned or preserved vegetables.

The principal articles forming the third group, "Crude materials for use in manufacturing," are raw cotton, wool, silk, and fibers; copper ore, matte, and regulus; coal; chemicals in a crude state; mineral oil, crude; cotton seed and flaxseed; leaf tobacco; logs, pulp wood, and cabinet wood.

The principal articles forming the class "Manufactures for further use in manufacturing" are copper in pigs, bars, and ingots; chemicals prepared for use in manufacturing; tin in pigs or blocks; yarns; iron in pigs, billets, blooms, bars, ingots, sheets, tin plates, and wire rods; diamonds cut but not set; naval stores; paraffin; leather; sawed and hewn timber, lumber, and wood pulp.

The principal articles included in the group "Manufactures ready for consumption" are agricultural implements; books; cars and carriages; clocks and watches; manufactures of cotton, wool, silk, and fibers; clothing; glass; glassware and chinaware; manufactures of iron, steel, brass, copper, zinc, and lead, ready for use; jewelry; boots, shoes, and gloves; refined mineral oil; vegetable oils except those used for food; animal oils; paper and manufactures thereof; soap; manufactures of tobacco; furniture; and other finished manufactures.

The principal articles forming the group "Miscellaneous" are horses and mules, nursery stock, and seeds for agricultural purposes.

In the import classification the old group "Articles of voluntary use, luxuries, etc.," disappears, most of the articles formerly contained in that group being transferred to the group "Manufactures ready for consumption," except diamonds, which are transferred to the groups "Crude materials for use in manufacturing" or "Manufactures for further use in manufacturing," according to the condition in which they are imported, and leaf tobacco, which is transferred to the group "Crude materials for use in manufacturing."

In the export classification the articles included in the old group "Products of agriculture" are chiefly transferred to the groups "Foodstuffs in crude condition, and food animals" and "Foodstuffs partly or wholly prepared," except raw cotton, wool, fibers, hides and skins, and unmanufactured tobacco, which are transferred to the group "Crude materials for use in manufacturing." The articles formerly grouped as "Products of the mines and forests" are chiefly transferred to the group "Crude materials for use in manufacturing," except lumber and naval stores, which are placed in the group "Manufactures for further use in manufacturing." Articles formerly grouped as "Products of the fisheries" are transferred to the "Foodstuffs" groups. The articles formerly grouped as "Manufactures" are divided into two groups, "Manufactures for further use in manufacturing" and "Manufactures ready for consumption."

This new grouping of imports and exports (*a*) presents a more intelligent analysis of the foreign commerce of the United States than that formerly utilized, (*b*) renders comparable the figures of imports and exports, (*c*) renders comparable our own commerce by large groups with that of the principal European countries, and (*d*) renders comparable the figures of the Bureau of Statistics and those of the Bureau of the Census, so far as relates to the production and exportation of manufactures. The groups "Manufactures for further use in manufacturing" and "Manufactures ready for consumption" include practically all articles formerly classed as manufactures, and if to these be added the group "Foodstuffs partly or wholly prepared" the total will show the exportation of practically all articles classed by the census as manufactures.

This new grouping, it should be understood, makes no change in the list of articles appearing in the Monthly Summary or annual volume, but merely rearranges them into new groups.

The new grouping begins with the month of July, 1906, with comparative figures under the new system for the immediately preceding year, and the summarizations of earlier years will also be readjusted to the new system so as to render them comparable with the figures of the present fiscal year when completed.

TONNAGE MOVEMENT IN TRADE OF UNITED STATES WITH ITS NONCONTIGUOUS TERRITORIES.

COMMERCE BETWEEN THE UNITED STATES AND ITS NONCONTIGUOUS TERRITORIES AND BETWEEN SAID TERRITORIES AND FOREIGN COUNTRIES.

The following tables show the commerce of the noncontiguous territories of the United States with the United States and with foreign countries for comparative periods of time. Customs collectors were not required prior to the act of April 29, 1902, to furnish statements of shipments of merchandise between the United States and its noncontiguous possessions.

Hawaii was annexed to the United States by act of Congress of July 7, 1898, and was made a Territory and customs district by act of April 30, 1900, which took effect June 14, 1900.

Porto Rico was taken possession of by the United States October 18, 1898, and was given a civil government and made a customs district by act of April 12, 1900, to take effect May 1, 1900.

The figures of the commerce between the Philippine Islands and the United States, while at present included in the general tables of foreign commerce of the United States, are also presented herewith in conjunction with the other tables of this group. The figures of the commerce between the Philippine Islands and foreign countries can not at present be obtained for months corresponding with those covered in the table of their commerce with the United States, and therefore the figures of foreign commerce of the islands for the corresponding months of the preceding year are presented as the most convenient means of comparing their foreign commerce with their commerce with the United States.

INTERNAL COMMERCE OF THE UNITED STATES.

JULY SUMMARY OF INTERNAL TRADE MOVEMENTS.

The Summary of Internal Commerce for July, 1906, includes tables exhibiting the comparative progress of trade movements in different parts of the United States for the month, for two or more successive years. These statistics are gathered partly through the cooperation of commercial organizations and transportation companies, partly by compilation from authoritative trade publications, and to an increasing extent from official reports made by this and other departments of the public service. Statistics of domestic commerce on the Great Lakes, unless otherwise credited, are compiled from supplementary manifests prepared by masters of vessels reporting through the collectors of customs. The changes in railroad freight rates found in Section X are furnished exclusively by the auditor's office of the Interstate Commerce Commission.

The tables which appear in this issue represent six different geographical sections, as follows: I. Commercial movements at interior centers; II. Coastwise commerce on the Great Lakes; III. Commercial movements at the North Atlantic seaboard; IV. Coastwise commerce at Atlantic and Gulf ports; V. Commercial movements in southern territory; and, VI. Commercial movements on the Pacific coast. Other tables representing no particular geographical sections are: VII. Commercial movements on rivers and canals; VIII. Commercial movements of coal, coke, petroleum, and phosphate; IX. Ocean freight rates; and, X. Changes in rail freight rates.

I.—COMMERCIAL MOVEMENTS AT INTERIOR CENTERS

[For tables pertaining to this section see page 162.]

Live-stock receipts at Chicago, Kansas City, Omaha, St. Louis, St. Joseph, St. Paul, and Sioux City during July totaled 3,046,479 head, in contrast with 2,798,639 in July, 1905, and 1,733,885 in July, 1904. For the first seven months of 1906 live-stock receipts at those markets aggregated 23,073,574 head, and were nearly 900,000 head in excess of corresponding movements in 1905, and over 2,700,000 greater than in 1904. Of the total movement, 9,486,175 were received at Chicago, 3,929,258 at Kansas City, 3,082,992 at Omaha, 2,641,579 at St. Louis, 2,067,788 at St. Joseph, 869,185 at St. Paul, and 996,597 at Sioux City. Aggregate cattle receipts were 4,739,254 head, calves 406,780, hogs 12,249,117, sheep 5,388,070, and horses and mules 290,353.

VI.—COMMERCIAL MOVEMENTS ON THE PACIFIC COAST.

[For tables pertaining to this section see page 190.]

Figures of California lumber shipments for May are to be found in the current issue. The Lumber Record Bureau, of San Francisco, is again supplying lumber statements, and it is hoped that all back figures will be received by the time that the August Summary of Internal Commerce goes to press.

The registered tonnage of vessels arriving at San Francisco during July amounted to 272,295 net tons, while for July, 1905, similar arrivals were represented by vessels of 294,380 net tons. Of the current month's movements, vessels of 75,375 tons were engaged in foreign commerce, while those arriving from domestic ports registered 196,920 net tons. During the first seven months of 1906 similar arrivals were represented by vessels of 2,054,221 net tons, while for like months in 1905 they aggregated 1,987,811 net tons. Of the former movement, the vessels engaged in foreign commerce registered 586,701 tons, and those in domestic trade, 1,467,520 tons. These figures illustrate the remarkable fact that, notwithstanding San Francisco has recently passed through one of the most unparalleled disasters of modern times, vessel arrivals at that point increased rather than diminished during the period which includes the earthquake and fire.

VIII.—COMMERCIAL MOVEMENTS OF COAL, COKE, PETROLEUM, AND PHOSPHATE.

[For tables pertaining to this section see page 197.]

Anthracite coal shipments during July from eastern producing regions totaled 4,981,448 tons, compared with 4,546,743 in July, 1905, and 4,623,227 in 1904. Owing to the small shipments during April and May, caused by labor difficulties, the movement for the balance of the calendar year should be heavy. During the first seven months of 1906 shipments from these regions aggregated 30,315,950 tons, against 35,263,740 for comparative months in 1905, and 33,880,434 in 1904.

Coal and coke traffic originating on the Pennsylvania Railroad Company's lines east of Pittsburg and Erie during the four weeks ending July 28 amounted to 3,560,749 tons, against 3,360,635 for like weeks in 1905, and 2,910,006 in 1904. During the first thirty weeks of 1906, 2,434,066 tons of anthracite, 17,807,632 tons bituminous, and 7,218,488 tons coke were shipped over this railroad, a total of 27,460,786 tons, in contrast with 25,136,407 for the corresponding period in 1905, and 22,851,187 in 1904.

Shipments of coke from this locality during the present year to July 31 required the use of 432,176 cars, 137,757 of which were destined to Pittsburg and the river, 239,053 to points west of Pittsburg, and 55,366 to points east of Connellsville. The total corresponding movement in 1905 was handled by 397,978 cars, and in 1904 by 288,018 cars.

IX.—OCEAN FREIGHT RATES.

[For tables pertaining to this section, see page 201.]

Ocean freight rates from Boston and New York to Europe during July did not vary materially from those in force at these ports during the corresponding months in 1905. At Baltimore, however, rates to Liverpool and a number of other foreign ports appear, by a similar comparison, to have been somewhat higher. Grain rates to Liverpool during the month were 1½ pence per bushel at Boston, 1 to 1½ pence at New York, and 3 pence at New Orleans. The compressed-cotton freight rate from the latter port to Liverpool remained steady at 26 cents per 100 pounds, being 2 cents lower than the July, 1905, rate. The flour rate also showed a reduction, being 10 cents for July, 1906, and 15 cents during the corresponding month in 1905.

X.—CHANGES IN RAILROAD FREIGHT RATES.

[For tables pertaining to this section see page 203.]

On August 22 the export proportional rates on grain from both Chicago and St. Louis to the Atlantic seaports east of, but not including Newport News and Norfolk, were reduced 1 cent per bushel, the new rate, however, to apply only on traffic originating west of the west bank of the Mississippi River. This made the Boston and New York rate 12 cents, the Philadelphia rate 11 cents, and the Baltimore rate 10½ cents per bushel. Other important changes which occurred in grain and flour rates from interior primary markets to both Atlantic and Gulf ports during the thirty days to August 25 will be found in the current summary.

COMPARISON OF CAR-SERVICE OPERATIONS.

A convenient index to the traffic activities of the country is found in the comparative figures of cars handled by the various car-service associations. Thirty-seven different associations report monthly the number of cars handled in their respective territories. Only in a very rough way, however, do these figures indicate the changes in volume of traffic, inasmuch as they do not, in some cases, include more than one-third of the cars actually handled at a given traffic center, and the territory under control of an association may be extended or contracted from time to time. The figures are given, nevertheless, as a convenient general gauge of increase or decrease of traffic by rail, assuming that they are made up on substantially the same basis from year to year.

The few complaints regarding car service received during July were almost entirely confined to the Southwest, where the movement of the surplus winter-wheat crop had begun, and to the Pacific coast, where unsatisfactory conditions were largely caused by heavy freight-car congestion at San Francisco. At Little Rock all classes of shipments were affected by the shortage in the car supply, while delays occurred in receiving freight consignments of every description. Reports from St. Joseph and Kansas City indicate scarcity of cars on which to load wheat, and as the movement of this cereal is expected to be very heavy, these conditions will probably exist to a greater or less extent for some months to come.

On the Pacific coast the shortage of cars was largely due, as stated above, to adverse conditions at San Francisco. Merchants, shortly after the fire, ordered large quantities of merchandise to replenish their stocks, but upon its arrival had no storehouses of sufficient size or security in which to place it. Added to this were the facts that trackage for discharging and teams for hauling were not of sufficient length and number, respectively, to meet the unusual demands.

For the reasons cited, consignees found it impossible to remove their freight promptly, and more than 7,000 cars became involved, so that in many instances railroads were compelled to decline offerings of heavy or bulk freight, principally lumber. Another contributory cause of the congestion was the sailors' strike, which diverted large shipments to San Francisco by rail. However, the situation is reported as rapidly clearing, and, if normal conditions prevail on or before the end of August, serious consequences affecting the moving of the incoming grain crops will be avoided.

While the shortage in the car supply during July was insignificant if compared with the generally satisfactory conditions, there are strong indications of an unusual scarcity in railroad equipment so soon as fall crops begin to move. The way in which many men prominent in commercial life view the situation is illustrated by a letter written by an executive officer of an important railroad system to the heads of its various departments in which he says that he believes that the business of their respective lines will average from 15 to 21 per cent more than for the same period in 1905, and that there will be as great a congestion of traffic and shortage of equipment by October 15 as ever before, this notwithstanding largely increased equipment during the current year. He attributes the causes of this expected increase in business to improvements in the ore, coal, and iron traffic, and to the improvements in the grain crops and general business conditions.

I.—COMMERCIAL MOVEMENTS AT INTERIOR CENTERS.

The territory embraced in this section extends from Minneapolis, in the Northwest, to Little Rock, in the Southwest, east as far as Buffalo, and south as far as the Ohio River. Interior traffic movements for July of succeeding years are shown by tables of live-stock receipts and shipments and comparative stocks of provisions at five packing-house centers; by tables of receipts and shipments of flour, grain, produce, and merchandise, and by trunk-line shipments of flour, grain, and provisions from Chicago. During the season of canal navigation canal and rail traffic in grain, flour, and general merchandise at Buffalo is given under this section. Ohio River traffic is reported under Section VII—Commercial movements on rivers and canals.

WESTERN LIVE-STOCK MOVEMENT.

This movement includes receipts and shipments for July at important interior markets for three successive years. For receipts of live stock at other markets, whose operations are reported in this issue, reference should be made to the general trade movements of those sections.

II.—DOMESTIC COMMERCE ON THE GREAT LAKES.

The traffic taken account of in the following tables, except where otherwise specified, is coastwise traffic only, and is confined strictly to commerce between domestic ports during the month of July and seven months ending with July. Unless otherwise credited, the statistics of domestic commerce reported herewith are compiled from supplementary manifests prepared by masters of vessels reporting through the collectors of customs.

During the month of July transactions at 141 ports of receipt and 209 ports of shipment were reported. The number of vessels arriving in July was 12,308 and the clearances numbered 12,314 vessels. The registered tonnage for the month was as follows: Arrivals, 13,491,943 net tons; clearances, 13,318,548 net tons. This total does not include the tonnage of vessels engaged in trade between the United States and Canada.

SUMMARY OF DOMESTIC LAKE TRAFFIC, JULY AND SEVEN MONTHS ENDING JULY, 1904–1906.

A summary of the lake traffic for July, compared with the corresponding months in 1904 and 1905, is given in the following table: The various quantities and units of freight are reduced to their equivalents in net tons. July receipts in 1906 at all ports reporting were 10,424,912 net tons, compared with 9,321,096 net tons in July, 1905, and 8,160,526 net tons in July, 1904. The figures of shipments of coal include coal loaded for vessels' fuel consumption.

IV.—COASTWISE COMMERCE AT ATLANTIC AND GULF PORTS.

The scope of commercial movements represented in this section usually includes receipts and shipments of merchandise between New York and New England ports, giving the bulk of the water-borne trade of nine of these ports with New York; coastwise receipts of southern pine and eastern spruce, by cargoes, at New York from sources of origin; and coastwise and foreign shipping movements at Boston, New York, Philadelphia, Mobile, Galveston, Port Arthur, and Sabine Pass. Coastwise coal shipments from New York, Philadelphia, Baltimore, Newport News, and Norfolk are also presented. Coastwise shipments of petroleum from Texas producing territory to Atlantic and Gulf ports are given in Section VIII.

COAL SHIPMENTS BY WATER FROM NEW YORK, PHILADELPHIA, BALTIMORE, NEWPORT NEWS, NORFOLK.

Through the courtesy and cooperation of nearly all of the more prominent shippers of coal by water from the Middle Atlantic ports of New York, Philadelphia, Baltimore, Newport News, and Norfolk, to Atlantic, Gulf, and Pacific coast ports, the following figures of the coastwise coal movement have been obtained. These statistics cover probably more than 90 per cent of the shipments for the places and periods mentioned, and include both anthracite and bituminous coal. Anthracite coal is shipped principally from New York Harbor wharves. From Philadelphia shipments are primarily bituminous and secondarily anthracite. From Baltimore, Newport News, and Norfolk shipments are almost wholly bituminous. During July vessels were supplied with fuel at these five ports to the amount of 192,048 tons, and 1,637,783 tons during seven months ending July.

During July 48 collectors of customs report 521,049 tons of coal loaded on vessels for fueling purposes on the Atlantic, Gulf, and Pacific coasts. Of this total, 143,743 tons were placed on board vessels destined to domestic destinations and 377,306 tons on foreign-bound vessels. The total value of this tonnage was reported as being $1,639,316, an average of about $3.14 per ton.

V.—COMMERCIAL MOVEMENTS IN SOUTHERN TERRITORY.

The territory covered in this section includes that lying south of the Potomac and Ohio rivers and east of the Mississippi River, and that portion west of the Mississippi included in the State of Louisiana, the Indian Territory, and Texas. The characteristic traffic movements are those of cotton, lumber, naval stores, and general commodities. Phosphate shipments are reported under Section VIII.

Cotton-trade reports include the statement of the quantity of the crop brought into sight, and its disposition, during successive crop years, to the end of June. Other articles of traffic reported are the grain and rice movements at New Orleans, shipments of yellow pine from the Southwest and from Virginia and the Carolinas to destinations, and river and rail traffic at Louisville, Ky., and Little Rock, Ark. Southern river trade is given in Section VII; southern coastwise shipments under Section IV.

SOUTHERN COTTON MOVEMENT.

According to the practice of the New Orleans Cotton Exchange, whose official figures are used, except when otherwise specified, the amount of cotton brought into sight from month to month during the season includes (1) receipts from plantations at ports; (2) receipts at the overland points of crossing on the Mississippi, Ohio, and Potomac rivers for shipment direct to northern and eastern mills, and (3) takings by southern mills. To this must be added (4) stocks left over at the end of the year at ports and interior towns. These four items together give the total commercial supply available for distribution.

VI.—COMMERCIAL MOVEMENTS ON THE PACIFIC COAST.

Traffic operations reported in this territory consist mainly of receipts from productive areas on the Pacific slope at seaboard ports of outlet, of coastwise movements between the upper and the lower Pacific coasts, and of overland shipments to the East. The operations usually reported include receipts and shipments of merchandise at San Francisco; redwood-lumber shipments from upper California; arrivals of redwood, pine, and fir at California coast points; lumber shipments from principal mills reporting in Washington; commerce at the port of Tacoma, and the shipments of citrus fruit from southern California.

The figures presented in the two following tables are the first received from the Lumber Record Bureau of San Francisco since the Pacific coast earthquake. While the movements shown are two months behind others presented in this report, the intervening month's figures will probably be received before the August Summary goes to press, so that the tables will be complete to date in that issue. By that time it is believed that the Department will also be able to recontinue the publication of the figures of receipts of staple products at San Francisco.

TRAFFIC ON THE MONONGAHELA RIVER.

The iron and steel products passing Lock No. 1 represent practically the output by the river. The coal passing downstream through Lock No. 3, plus 64,403 tons mined in the first and second pools during July, 1906, makes a total coal traffic of 720,203 tons for the river, and 5,612,074 tons for the seven months ending July. Of other downstream freight, 18,838 tons of miscellaneous merchandise are to be added, making a total of 739,041 net tons in July and 5,834,952 tons in seven months. Lock No. 3 represents approximately the general aggregate of down-river tonnage.

Of upstream freight, that passing through Lock No. 1 represents approximately the general movement in this direction. The freight passing this point in July amounted to 165,274 tons and 805,070 tons in seven months.

The total freight moved in both directions, on this basis of calculation, was 904,315 net tons in July, 1906, as against 1,042,967 net tons in July, 1905, and 562,549 tons in July, 1904. For seven months ending with July, 1906, the total movement was 6,640,022 tons, 6,505,352 tons in 1905, and 5,084,583 tons in 1904.

VESSEL MOVEMENT ON THE MISSISSIPPI AND OHIO RIVERS VIA CAIRO, ILL.

The following table is compiled from monthly reports received from Cairo, Ill., giving the number and tonnage of vessels passing or having their termini there. The tonnage of boats and barges is estimated tonnage. The tonnage of steamboats is actual.

The total through movement represents vessels passing Cairo to or from points on the Ohio, Mississippi, and other rivers. The local movement at Cairo represents vessels having Cairo as one of their termini. (The monthly reports of arrivals and clearances are made by Mr. George Parsons, trustee of Cairo trust property, who is intimately acquainted with river operations at this point.)

For the seven months ending July 31, 1906, of the vessels reported, 911 were loaded with coal; 356 carried lumber, logs, piling, and wood; 32 carried ties; 390 carried merchandise; 13 brick and rock; 4 carried sugar and molasses; 11 grain; 14 steel; 6 coke; and 6 iron and nails.

During January, 1906, the stage of water at Cairo rose from 25.62 feet on January 1 to 35.13 feet on January 31; the highest mark was 36.20 feet and the lowest 24.67 feet. In February the water fell from 35.10 feet on February 1 to 15.52 feet on February 21, but rose until on February 28 the mark registered was 23.88 feet. The highest figure was on February 1 and the lowest on February 21.

On March 1 the stage of water was 25.52 feet, rising to 33.86 on March 10. It fell to 29.20 feet on March 17, and on March 31 the register was 41.25 feet.

On April 1 the stage of water was 43.03 feet, rising to 46.90 on the 9th. From this date it fell gradually until the close of the month, when it registered 29.60 feet.

On May 1 the stage of water was 28.80 feet, rising to 29.78 on May 2. From this date it fell gradually until May 30, when it reached 16.40. On May 31 it registered 16.52 feet.

On June 1 the stage of the water at Cairo was 16.70 feet, the minimum for the month. The maximum was reached on June 27, when 23.48 feet were recorded. On June 30 the water stood at 21.80 feet.

On July 1 the stage of water at Cairo was 21.97 feet. The minimum for the month was reached July 15, when 17.85 feet was recorded, and the maximum on July 29, with 22.46 feet. On July 31 the water stood 21.70 feet.

VIII.—COMMERCIAL MOVEMENTS OF COAL, COKE, PETROLEUM, AND PHOSPHATE.

The series of tables following present some of the leading traffic operations in domestic coal, coke, petroleum, and phosphate. They include shipments of anthracite coal from the anthracite regions, anthracite and bituminous coal and coke traffic originating east of Pittsburg and Erie on the Pennsylvania Railroad system; coal and coke shipments over the Baltimore and Ohio Railroad, the Chesapeake and Ohio Railway, and the Southern Railway; weekly Connellsville coke output and shipments; St. Louis receipts of coal, and receipts and shipments of coal and coke at Chicago, and, to a limited extent, the phosphate movement. Petroleum statistics are included for the pipe-line territory and for the Texas territory, showing coastwise shipments from Sabine Pass and Port Arthur, Tex., to leading destinations. For coastwise coal trade generally, see Section IV; for Lake trade, Section II.

X.—CHANGES IN RAILROAD FREIGHT RATES.

Changes in railroad freight rates as presented in the following tables are obtained through the courtesy of the Interstate Commerce Commission, the auditor of that body transmitting them on the latest date which will permit of their insertion in the Summary. In this manner their publication is assured as soon after their receipt as possible, and as a rule they cover a period nearly a month later than that represented by other statements throughout this report.

The matter of deciding what changes shall be considered of enough importance to be presented is left entirely to the discretion of the Commission, all tables which they submit being published without reservation of any kind. This, however, must not be taken to indicate that all important changes are included, as such a presentation would be a practical impossibility, owing to the great number of tariffs to be examined and the short time in which to procure the rates therefrom.

EXPLANATIONS OF REGULAR STATISTICAL TABLES.

General imports.—The regular statement of imports of merchandise, by articles and countries, in this publication is what is termed the statement of *general imports,* embracing imported articles entered for immediate consumption on arrival and articles entered for warehouse, as distinguished from special imports, which embrace imports entered for immediate consumption and withdrawals from warehouse for consumption.

The statement of *general imports* and the statement of *imports entered for consumption* for any period will differ to the extent that the value of *entries for warehouse* for the period differs from the value of *withdrawals from warehouse for consumption.* The term "*entry for consumption*" is the technical name of the import entry made at the custom-house, and does not imply that the goods have been actually consumed, but simply that they have been delivered into the custody of the importer and that the duties have been paid on the dutiable portion.

The values of articles imported since August 1, 1890, are governed by the provisions of section 19 of the act of June 10, 1890, which prescribes that the values of imported merchandise subject to ad valorem rates of duty shall be "the actual market value or wholesale price of such merchandise as bought and sold in usual wholesale quantities at the time of exportation to the United States in the principal markets of the country from whence imported and in the condition in which such merchandise is there bought for exportation to the United States or consigned to the United States for sale, including the value of all cartons, cases, crates, boxes, sacks, and coverings of any kind, and all other costs, charges, and expenses incident to placing the merchandise in condition ready for shipment to the United States."

Domestic exports.—The regular statement of domestic exports, by articles and countries, in this publication exhibits the exports of domestic products or manufactures, also exports of commodities of foreign origin which have been changed from the form in which they were imported or enhanced in value by further manufacture in the United States, such as sugar refined in this country from imported raw sugar, flour ground from imported wheat, and articles, utensils, etc., made from imported materials. The value of exports of domestic merchandise is their value at the time of exportation in the ports of the United States whence they are exported.

Foreign exports.—The regular statement of foreign exports, by articles, in this publication, sometimes called "reexports," exhibits exports of foreign merchandise which had been imported. The value of such commodities exported "from warehouse" is their import value; the value of such commodities exported "not from warehouse," comprising free goods mainly, is the value at the ports of the United States whence they are exported.

Warehoused merchandise.—The regular statement of articles remaining in warehouse in this publication exhibits imported merchandise in bonded warehouses. This merchandise has already appeared in the statement of *general imports.* The official values of the articles therein represented are the same as the *import values.*

Tonnage tables.—In the tables of tonnage movement in American foreign trade the tonnage is stated in net tons of 100 cubic feet carrying space after the prescribed allowances are made for crew space, engine space, etc.

Weights.—In all tables published by the Bureau the ton weight is 2,240 pounds and the hundredweight is 112 pounds, unless indicated otherwise.

Customs districts.—Statements of imports, exports, and tonnage movement are shown by customs districts, which have a certain prescribed limit of territory with a port of entry. The customs districts having the port of entry with name different from that of the customs district are the following:

TONNAGE MOVEMENT IN TRADE OF UNITED STATES WITH ITS NONCONTIGUOUS TERRITORIES.

COMMERCE BETWEEN THE UNITED STATES AND ITS NONCONTIGUOUS TERRITORIES AND BETWEEN SAID TERRITORIES AND FOREIGN COUNTRIES.

The following tables show the commerce of the noncontiguous territories of the United States with the United States and with foreign countries for comparative periods of time. Customs collectors were not required prior to the act of April 29, 1902, to furnish statements of shipments of merchandise between the United States and its noncontiguous possessions.

Hawaii was annexed to the United States by act of Congress of July 7, 1898, and was made a Territory and customs district by act of April 30, 1900, which took effect June 14, 1900.

Porto Rico was taken possession of by the United States October 18, 1898, and was given a civil government and made a customs district by act of April 12, 1900, to take effect May 1, 1900.

The figures of the commerce between the Philippine Islands and the United States, while at present included in the general tables of foreign commerce of the United States, are also presented herewith in conjunction with the other tables of this group. The figures of the commerce between the Philippine Islands and foreign countries can not at present be obtained for months corresponding with those covered in the table of their commerce with the United States, and therefore the figures of foreign commerce of the islands for the corresponding months of the preceding year are presented as the most convenient means of comparing their foreign commerce with their commerce with the United States.

INTERNAL COMMERCE OF THE UNITED STATES.

AUGUST SUMMARY OF INTERNAL TRADE MOVEMENTS.

The Summary of Internal Commerce for August, 1906, includes tables exhibiting the comparative progress of trade movements in different parts of the United States for the month and eight months for two or more successive years. These statistics are gathered partly through the cooperation of commercial organizations and transportation companies, partly by compilation from authoritative trade publications, and to an increasing extent from official reports made by this and other departments of the public service. Statistics of domestic commerce on the Great Lakes, unless otherwise credited, are compiled from supplementary manifests prepared by masters of vessels reporting through the collectors of customs. The changes in railroad freight rates found in Section X are furnished exclusively by the auditor's office of the Interstate Commerce Commission.

The tables which appear in this issue represent six different geographical sections, as follows: I. Commercial movements at interior centers; II. Coastwise commerce on the Great Lakes; III. Commercial movements at the North Atlantic seaboard; IV. Coastwise commerce at Atlantic and Gulf ports; V. Commercial movements in southern territory; and, VI. Commercial movements on the Pacific coast. Other tables representing no particular geographical sections are: VII. Commercial movements on rivers and canals; VIII. Commercial movements of coal, coke, petroleum, and phosphate; IX. Ocean freight rates; and, X. Changes in rail freight rates.

COMPARISON OF CAR-SERVICE OPERATIONS.

A convenient index to the traffic activities of the country is found in the comparative figures of cars handled by the various car-service associations. Thirty-seven different associations report monthly the number of cars handled in their respective territories. Only in a very rough way, however, do these figures indicate the changes in volume of traffic, inasmuch as they do not, in some cases, include more than one-third of the cars actually handled at a given traffic center, and the territory under control of an association may be extended or contracted from time to time. The figures are given, nevertheless, as a convenient general gauge of increase or decrease of traffic by rail, assuming that they are made up on substantially the same basis from year to year.

Reports from practically all sections of the country indicate that while the railroads had about all the traffic they could handle during the month of August, there was not any great shortage in the car supply, though at a number of interior grain markets delays of a few days occasionally occurred in getting the necessary cars for grain shipments. On the Pacific coast there still existed serious shortage in the car supply, owing to the San Francisco freight blockade, but conditions appeared to be steadily improving.

I.—COMMERCIAL MOVEMENTS AT INTERIOR CENTERS.

The territory embraced in this section extends from Minneapolis, in the Northwest, to Little Rock, in the Southwest, east as far as Buffalo, and south as far as the Ohio River. Interior traffic movements for August of succeeding years are shown by tables of live-stock receipts and shipments and comparative stocks of provisions at five packing-house centers; by tables of receipts and shipments of flour, grain, produce, and merchandise, and by trunk-line shipments of flour, grain, and provisions from Chicago. During the season of canal navigation canal and rail traffic in grain, flour, and general merchandise at Buffalo is given under this section. Ohio River traffic is reported under Section VII—Commercial movements on rivers and canals.

WESTERN LIVE-STOCK MOVEMENT.

This movement includes receipts and shipments for August at important interior markets for three successive years. For receipts of live stock at other markets, whose operations are reported in this issue, reference should be made to the general trade movements of those sections.

II.—DOMESTIC COMMERCE ON THE GREAT LAKES.

The traffic taken account of in the following tables, except where otherwise specified, is coastwise traffic only, and is confined strictly to commerce between domestic ports during the month of August and eight months ending with August. Unless otherwise credited, the statistics of domestic commerce reported herewith are compiled from supplementary manifests prepared by masters of vessels reporting through the collectors of customs.

During the month of August transactions at 140 ports of receipt and 197 ports of shipment were reported. The number of vessels arriving in August was 10,884 and the clearances numbered 10,975 vessels. The registered tonnage for the month was as follows: Arrivals, 13,580,201 net tons; clearances, 13,637,133 net tons. This total does not include the tonnage of vessels engaged in trade between the United States and Canada.

SUMMARY OF DOMESTIC LAKE TRAFFIC, JULY AND SEVEN MONTHS ENDING JULY, 1904–1906.

A summary of the lake traffic for August, compared with the corresponding months in 1904 and 1905, is given in the following table: The various quantities and units of freight are reduced to their equivalents in net tons. August receipts in 1906 at all ports reporting were 10,484,580 net tons, compared with 9,501,759 net tons in August, 1905, and 8,999,279 net tons in August, 1904. The figures of shipments of coal include coal loaded for vessels' fuel consumption as follows: August, 1906, 262,567 net tons, and 1905, 264,897 net tons. During the season ending August 31, 1906, there were 1,121,609 net tons loaded for fuel consumption, as compared with 1,099,815 net tons loaded in 1905.

III.—COMMERCIAL MOVEMENTS ON THE NORTH ATLANTIC SEABOARD.

The territory covered by these movements includes the Atlantic coast south as far as Baltimore, Md. The operations reported include the receipts and shipments of flour and grain for July at the North Atlantic ports of Boston, New York, Philadelphia, and Baltimore.

GRAIN RECEIPTS AT FIVE DOMESTIC SEAPORTS.

Below is given a comparative table of receipts of grain, including flour and meal reduced to bushels, at five seaboard markets during August and eight months ending August, 1904, 1905, and 1906. The figures are derived in every case from the reports of the commercial organizations closely identified with the grain trade at the respective localities. These totals serve to show the relative share of each port in this branch of domestic commerce.

IV.—COASTWISE COMMERCE AT ATLANTIC AND GULF PORTS.

The scope of commercial movements represented in this section usually includes receipts and shipments of merchandise between New York and New England ports, giving the bulk of the water-borne trade of nine of these ports with New York; coastwise receipts of southern pine and eastern spruce, by cargoes, at New York from sources of origin; and coastwise and foreign shipping movements at Boston, New York, Philadelphia, Mobile, Galveston, Port Arthur, and Sabine Pass. Coastwise coal shipments from New York, Philadelphia, Baltimore, Newport News, and Norfolk are also presented. Coastwise shipments of petroleum from Texas producing territory to Atlantic and Gulf ports and coastwise phosphate shipments are given in Section VIII.

COAL SHIPMENTS BY WATER FROM NEW YORK, PHILADELPHIA, BALTIMORE, NEWPORT NEWS, NORFOLK.

Through the courtesy and cooperation of nearly all of the more prominent shippers of coal by water from the Middle Atlantic ports of New York, Philadelphia, Baltimore, Newport News, and Norfolk, to Atlantic, Gulf, and Pacific coast ports, the following figures of the coastwise coal movement have been obtained. These statistics cover probably more than 90 per cent of the shipments for the places and periods mentioned, and include both anthracite and bituminous coal. Anthracite coal is shipped principally from New York Harbor wharves. From Philadelphia shipments are primarily bituminous and secondarily anthracite. From Baltimore, Newport News, and Norfolk shipments are almost wholly bituminous. During August vessels were supplied with fuel at these five ports to the amount of 252,721 tons, and 1,890,504 tons during eight months ending August.

During August 44 collectors of customs report 552,137 tons of coal loaded on vessels for fueling purposes on the Atlantic, Gulf, and Pacific coasts. Of this total, 152,460 tons were placed on board vessels destined to domestic destinations and 399,677 tons on foreign-bound vessels. The total value of this tonnage was reported as being $1,722,093, an average of about $3.12 per ton.

V.—COMMERCIAL MOVEMENTS IN SOUTHERN TERRITORY.

The territory covered in this section includes that lying south of the Potomac and Ohio rivers and east of the Mississippi River, and that portion west of the Mississippi included in the State of Louisiana, the Indian Territory, and Texas. The characteristic traffic movements are those of cotton, lumber, naval stores, and general commodities. Phosphate shipments are reported under Section VIII.

Cotton-trade reports include the statement of the quantity of the crop brought into sight, and its disposition, during successive crop years, to the end of August. Other articles of traffic reported are the grain and rice movements at New Orleans, shipments of yellow pine from the Southwest and from Virginia and the Carolinas to destinations, and river and rail traffic at Louisville, Ky., and Little Rock, Ark. Southern river trade is given in Section VII; southern coastwise shipments, under Section IV.

SOUTHERN COTTON MOVEMENT.

According to the practice of the New Orleans Cotton Exchange, whose official figures are used, except when otherwise specified, the amount of cotton brought into sight from month to month during the season includes (1) receipts from plantations at ports; (2) receipts at the overland points of crossing on the Mississippi, Ohio, and Potomac rivers for shipment direct to northern and eastern mills, and (3) takings by southern mills. To this must be added (4) stocks left over at the end of the year at ports and interior towns. These four items together give the total commercial supply available for distribution.

VII.—COMMERCIAL MOVEMENTS ON RIVERS AND CANALS.

The movements of domestic trade represented under this heading are not confined to any particular geographical division of the country. Operations on some of the leading waterways include those on the Monongahela River between Pittsburg, Pa., and Fairmont, W. Va.; the Ohio River at Davis Island dam, Bellevue, Pa., and at Louisville, Ky.; the vessel movement at Cairo, Ill., on the Ohio and the Mississippi rivers; the traffic movements on the Delaware and Chesapeake Canal, connecting the Chesapeake and Delaware bays, and similar movements on various other navigable streams about whose navigation acceptable information is periodically available. Movements through the canals of the Great Lakes will be found in Section II.

TRAFFIC ON THE MONONGAHELA RIVER.

The iron and steel products passing Lock No. 1 represent practically the output by the river. The coal passing through Lock No. 3, plus 45,350 tons mined in the first and second pools during August, 1906, makes a total coal traffic of 754,690 tons for the river, and 6,366,976 tons for the eight months ending August. Of other downstream freight, 44,888 tons of miscellaneous merchandise are to be added, making a total of 798,938 net tons in August and 6,633,890 tons in eight months. Lock No. 3 represents approximately the general aggregate of down-river tonnage.

Of upstream freight, that passing through Lock No. 1 represents approximately the general movement in this direction. The freight passing this point in August amounted to 118,822 tons and 923,892 tons in eight months.

The total freight moved in both directions, on this basis of calculation, was 917,760 net tons in August, 1906, as against 912,728 net tons in August, 1905, and 469,823 net tons in August, 1904.

For eight months ending with August the total movement was 7,557,782 tons in 1906, 7,418,080 tons in 1905, and 5,554,406 tons in 1904.

VESSEL MOVEMENT ON THE MISSISSIPPI AND OHIO RIVERS VIA CAIRO, ILL.

The following table is compiled from monthly reports received from Cairo, Ill., giving the number and tonnage of vessels passing or having their termini there. The tonnage of boats and barges is estimated tonnage. The tonnage of steamboats is actual.

The total through movement represents vessels passing Cairo to or from points on the Ohio, Mississippi, and other rivers. The local movement at Cairo represents vessels having Cairo as one of their termini. (The monthly reports of arrivals and clearances are made by Mr. George Parsons, trustee of Cairo trust property, who is intimately acquainted with river operations at this point.)

For the eight months ending August 31, 1906, of the vessels reported, 1,143 were loaded with coal; 401 carried lumber, logs, piling, and wood; 38 carried ties; 454 carried merchandise; 13 brick and rock; 4 carried sugar and molasses; 12 grain; 14 steel; 6 coke; 6 iron and nails, and 1 cement.

During January, 1906, the stage of water at Cairo rose from 25.62 feet on January 1 to 35.13 feet on January 31; the highest mark was 36.20 feet and the lowest 24.67 feet. In February the water fell from 35.10 feet on February 1 to 15.52 feet on February 21, but rose until on February 28 the mark registered was 23.88 feet. The highest figure was on February 1 and the lowest on February 21.

On March 1 the stage of water was 25.52 feet, rising to 33.86 on March 10. It fell to 29.20 feet on March 17, and on March 31 the register was 41.25 feet, the highest mark during the three months of 1906.

On April 1 the stage of water was 43.03 feet, rising to 46.90 on the 9th. From this date it fell gradually until the close of the month, when it registered 29.60 feet.

VIII.—COMMERCIAL MOVEMENTS OF COAL, COKE, PETROLEUM, AND PHOSPHATE.

The series of tables following present some of the leading traffic operations in domestic coal, coke, petroleum, and phosphate. They include shipments of anthracite coal from the anthracite regions, anthracite and bituminous coal and coke traffic originating east of Pittsburg and Erie on the Pennsylvania Railroad system; coal and coke shipments over the Baltimore and Ohio Railroad, the

Chesapeake and Ohio Railway, and the Southern Railway; weekly Connellsville coke output and shipments; St. Louis receipts of coal, and receipts and shipments of coal and coke at Chicago, and, to a limited extent, the phosphate movement. Petroleum statistics are included for pipe-line territory and for the Texas territory, showing coastwise shipments from Galveston, Sabine Pass, and Port Arthur, Tex., to leading destinations. For coastwise coal trade generally, see Section IV; for Lake trade, Section II.

STATEMENT OF PETROLEUM PIPE LINES IN APPALACHIAN, LIMA-INDIANA, AND MIDCONTINENTAL FIELDS.

The following table shows the business of the principal petroleum pipe lines in the Appalachian, Lima-Indiana, and Midcontinental fields. The Appalachian field includes Pennsylvania, New York, West Virginia, southeastern Ohio, Kentucky, and Tennessee. The Lima-Indiana field includes northwestern Ohio, Indiana, and a small production in Illinois. The Midcontinental field includes Kansas, Indian Territory, and Oklahoma.

The pipe lines which report no runs from wells receive their oil through other pipe lines. The regular deliveries represent deliveries to refineries and for export and do not include deliveries to other pipe lines. The runs from wells represent Appalachian oil exclusively, in the case of all companies except three, namely: The Buckeye, which receives Appalachian crude from southeastern Ohio and Lima-Indiana crude from northwestern Ohio; the Indiana Pipe Line Company, which receives crude from Indiana and Illinois, and the Prairie Oil and Gas Company, which operates in the Midcontinental field.

Prior to August, 1906, the Buckeye pipe line reported separately its Appalachian crude, and its Lima-Indiana crude was reported jointly with that of the Indiana pipe line. Furthermore, prior to that date, the pipe lines distinguished deliveries and net stocks of Appalachian oil from those of Lima-Indiana oil, but at present the deliveries and stocks of several of the companies reported in the following table include both kinds of crude oil.

Net stocks, often called liabilities, represent the amount of oil for which the pipe lines have receipted to producers and which they are liable for. In addition, the pipe lines hold a certain amount of sediment and surplus oil which, combined with net stocks, constitute gross stocks.

Statement of various Petroleum Pipe Lines for the Month of August, 1906.

X.—CHANGES IN RAILROAD FREIGHT RATES.

Changes in railroad freight rates as presented in the following tables are obtained through the courtesy of the Interstate Commerce Commission, the auditor of that body transmitting them on the latest date which will permit of their insertion in the Summary. In this manner their publication is assured as soon after their receipt as possible, and as a rule they cover a period nearly a month later than that represented by other statements throughout this report.

The matter of deciding what changes shall be considered of enough importance to be presented is left entirely to the discretion of the Commission, all tables which they submit being published without reservation of any kind. This, however, must not be taken to indicate that all important changes are included, as such a presentation would be a practical impossibility, owing to the great number of tariffs to be examined and the short time in which to procure the rates therefrom.

EXPLANATIONS OF REGULAR STATISTICAL TABLES.

General Imports.—The regular statement of imports of merchandise, by articles and countries, in this publication is what is termed the statement of *general imports*, embracing imported articles entered for immediate consumption on arrival and articles entered for warehouse, as distinguished from special imports, which embrace imports entered for immediate consumption and withdrawals from warehouse for consumption.

The statement of *general imports* and the statement of *imports entered for consumption* for any period will differ to the extent that the value of *entries for warehouse* for the period differs from the value of *withdrawals from warehouse for consumption*. The term "*entry for consumption*" is the technical name of the import entry made at the custom-house, and does not imply that the goods have been actually consumed, but simply that they have been delivered into the custody of the importer and that the duties have been paid on the dutiable portion.

The values of articles imported since August 1, 1890, are governed by the provisions of section 19 of the act of June 10, 1890, which prescribes that the values of imported merchandise subject to ad valorem rates of duty shall be "the actual market value or wholesale price of such merchandise as bought and sold in usual wholesale quantities at the time of exportation to the United States in the principal markets of the country from whence imported and in the condition in which such merchandise is there bought for exportation to the United States or consigned to the United States for sale, including the value of all cartons, cases, crates, boxes, sacks, and coverings of any kind, and all other costs charges, and expenses incident to placing the merchandise in condition ready for shipment to the United States."

Domestic exports.—The regular statement of domestic exports, by articles and countries, in this publication exhibits the exports of domestic products or manufactures, also exports of commodities of foreign origin which have been changed from the form in which they were imported or enhanced in value by further manufacture in the United States, such as sugar refined in this country from imported raw sugar, flour ground from imported wheat, and articles, utensils, etc., made from imported materials. The value of exports of domestic merchandise is their value at the time of exportation in the ports of the United States whence they are exported.

Foreign exports.—The regular statement of foreign exports, by articles, in this publication, sometimes called "reexports," exhibits exports of foreign merchandise which had been imported. The value of such commodities exported "from warehouse" is their import value; the value of such commodities exported "not from warehouse," comprising free goods mainly, is the value at the ports of the United States whence they are exported.

Warehoused merchandise.—The regular statement of articles remaining in warehouse in this publication exhibits imported merchandise in bonded warehouses. This merchandise has already appeared in the statement of *general imports*. The official values of the articles therein represented are the same as the *import values*.

Tonnage tables.—In the tables of tonnage movement in American foreign trade the tonnage is stated in net tons of 100 cubic feet carrying space after the prescribed allowances are made for crew space, engine space, etc.

Weights.—In all tables published by the Bureau the ton weight is 2,240 pounds and the hundredweight is 112 pounds, unless indicated otherwise.

Customs districts.—Statements of imports, exports, and tonnage movement are shown by customs districts, which have a certain prescribed limit of territory with a port of entry. The customs districts having the port of entry with name different from that of the customs district are the following:

TONNAGE MOVEMENT IN THE TRADE OF UNITED STATES WITH ITS NONCONTIGUOUS TERRITORIES.

COMMERCE BETWEEN THE UNITED STATES AND ITS NONCONTIGUOUS TERRITORIES AND BETWEEN SAID TERRITORIES AND FOREIGN COUNTRIES.

The following tables show the commerce of the noncontiguous territories of the United States with the United States and with foreign countries for comparative periods of time. Customs collectors were not required prior to the act of April 29, 1902, to furnish statements of shipments of merchandise between the United States and its noncontiguous possessions.

Hawaii was annexed to the United States by act of Congress of July 7, 1898, and was made a Territory and customs district by act of April 30, 1900, which took effect June 14, 1900.

Porto Rico was taken possession of by the United States October 18, 1898, and was given a civil government and made a customs district by act of April 12, 1900, to take effect May 1, 1900.

The figures of the commerce between the Philippine Islands and the United States, while at present included in the general tables of foreign commerce of the United States, are also presented herewith in conjunction with the other tables of this group. The figures of the commerce between the Philippine Islands and foreign countries can not at present be obtained for months corresponding with those covered in the table of their commerce with the United States, and therefore the figures of foreign commerce of the islands for the corresponding months of the preceding year are presented as the most convenient means of comparing their foreign commerce with their commerce with the United States.

INTERNAL COMMERCE OF THE UNITED STATES.

SEPTEMBER SUMMARY OF INTERNAL TRADE MOVEMENTS.

The Summary of Internal Commerce for September, 1906, includes tables exhibiting the comparative progress of trade movements in different parts of the United States for the month and nine months for two or more successive years. These statistics are gathered partly through the cooperation of commercial organizations and transportation companies, partly by compilation from authoritative trade publications, and to an increasing extent from official reports made by this and other departments of the public service. Statistics of domestic commerce on the Great Lakes, unless otherwise credited, are compiled from supplementary manifests prepared by masters of vessels reporting through the collectors of customs. The changes in railroad freight rates found in Section X are furnished exclusively by the auditor's office of the Interstate Commerce Commission.

The tables which appear in this issue represent six different geographical sections, as follows: I. Commercial movements at interior centers; II. Coastwise commerce on the Great Lakes; III. Commercial movements at the North Atlantic seaboard; IV. Coastwise commerce at Atlantic and Gulf ports; V. Commercial movements in southern territory; and, VI. Commercial movements on the Pacific coast. Other tables representing no particular geographical sections are: VII. Commercial movements on rivers and canals; VIII. Commercial movements of coal, coke, petroleum, and phosphate; IX. Ocean freight rates; and, X. Changes in rail freight rates.

I.—COMMERCIAL MOVEMENTS AT INTERIOR CENTERS.

[For tables pertaining to this section see page 594.]

Live-stock receipts at Chicago, Kansas City, Omaha, St. Louis, St. Joseph, St. Paul, and Sioux City during September totaled 3,380,182 head, over 300,000 below corresponding movements in 1905, but nearly 100,000 in excess of those for 1904. As compared with the September, 1905, receipts, all classes of animals show a decrease. Omaha is the only market of the seven where an increase occurred in total receipts, the movement at that market having amounted to 571,655 head against 523,740 in September, 1905. However, losses in the receipts of cattle, horses, and mules occurred even at that market, the gains in the arrivals of hogs and sheep being of more than sufficient size to offset such decreases. During the first nine months of the current year arrivals of live stock at the markets specified aggregated 29,749,281 head, in contrast with 28,957,686 for corresponding months in 1905, and 26,645,064 in 1904. Chicago received 12,104,605 head; Kansas City, 5,051,892; Omaha, 4,154,047; St. Louis, 3,412,574; St. Joseph, 2,588,408; St. Paul, 1,203,024, and Sioux City, 1,234,731. The total receipts were divided into the following classes: Cattle and calves, 7,023,986 head; hogs, 14,881,993; sheep, 7,471,720, and horses and mules, 371,582. Gains were made in all of the classes of animals indicated, as compared with like receipts in 1905.

Stocks of meat at hand at Chicago at the close of business on September 30 amounted to 81,766,558 pounds, at Kansas City to 34,280,700, at Omaha to 26,089,501, at St. Joseph to 28,083,563, and at Milwaukee to 11,875,300, a total of 182,095,622 pounds, against corresponding stocks of 172,573,633 in 1905 and 175,933,480 in 1904.

Eastbound provision movements from Chicago and Chicago Junction points during September amounted to 100,941 tons, while like shipments for the first nine months of the year aggregated 1,054,967 tons. Corresponding shipments in 1905 were for the month 118,631 tons and for the nine months 1,033,466 tons, and in 1904, 96,940 and 969,573 tons, respectively.

Shipments of packing-house products from Chicago during September totaled 209,180,411 pounds, against 227,781,880 pounds in September, 1905, and 190,124,569 in September, 1904. The decrease indicated in the 1906 movement, as compared with that for 1905, was caused by lighter withdrawals of beef, canned meats, cured meats, dressed beef, lard, and pork, slight increases having occurred in the shipments of dressed hogs and hides. During the first nine months of the current year similar shipments from this city aggregated 2,099,825,381 pounds, over 200 millions in excess of corresponding shipments in 1905, and more than 300 millions greater than those of 1904. As compared with the 1905 figures, all products showed an increased movement, with the exception of canned meats and dressed hogs, which, in the current year, were 94,608,375 and 9,130,500 pounds, respectively, compared with 105,096,825 and 17,946,300 pounds, respectively, in 1905. The three heaviest items in the present year's shipments were 856,659,027 pounds of dressed beef, 626,588,729 pounds of cured meats, and 318,119,993 pounds of lard.

Ocean freight rates from Atlantic and Gulf ports during September were, in a number of instances, in excess of those for August, 1904, although grain rates from both New York and Boston, which ranged from 1¼ to 1½ pence per bushel from New York to Liverpool and 1½ pence per bushel from Boston to Liverpool, were somewhat lower than corresponding rates in the preceding year. At New

X.—CHANGES IN RAILROAD FREIGHT RATES.

[For tables pertaining to this section see page 637.]

A number of important changes in grain and provision rates from interior markets to both Atlantic and Gulf ports occurred during the month of October. On the 15th of that month the export proportional grain rates from both Chicago and East St. Louis to New York, Boston, Philadelphia, and Baltimore, were increased 1 cent per bushel. The Chicago rate, however, applies only on traffic originating west of the west bank of the Mississippi River when actually exported on through bill of lading to a foreign port. On October 18 the through proportional export rates on wheat and other grains, from Kansas City and Omaha to Atlantic ports, were withdrawn, and on this same date export proportional flour rates from Kansas City to Galveston and New Orleans were increased 2½ cents. The same increase applies to similar rates from Omaha to New Orleans, although from Omaha to Galveston the flour rate underwent an increase of 1 cent only. Proportional export grain rates also, from St. Louis, Omaha, and Kansas City, to Galveston and New Orleans, were all increased 1 cent per bushel.

The changes herein briefly referred to are shown in detail in Section X of the current Summary.

COMPARISON OF CAR-SERVICE OPERATIONS.

A convenient index to the traffic activities of the country is found in the comparative figures of cars handled by the various car-service associations. Thirty-seven different associations report monthly the number of cars handled in their respective territories. Only in a very rough way, however, do these figures indicate the changes in volume of traffic, inasmuch as they do not, in some cases, include more than one-third of the cars actually handled at a given traffic center, and the territory under control of an association may be extended or contracted from time to time. The figures are given, nevertheless, as a convenient general gauge of increase or decrease of traffic by rail, assuming that they are made up on substantially the same basis from year to year.

Reports received from commercial organizations throughout the country indicate that considerable car shortage existed during September, especially in the middle, northwestern, and southwestern States, where exceptionally heavy demands upon the railroads were being made for the movement of grain. At Toledo, Ohio, although shippers had little trouble in procuring the necessary cars, the arrival of freight from the South was greatly delayed and caused much complaint. Shipments from Michigan to that city were also far behind, owing to the scarcity of cars in that State. At Des Moines, Iowa, the situation was very acute, all classes of equipment being affected, including refrigerator, box, coal, and flat cars, and necessarily affecting all classes of shippers. At Grand Rapids, Mich., similar conditions existed, all classes of shippers having been more or less affected, although furniture manufacturers are reported as especially inconvenienced by the shortage. At Milwaukee there was a great scarcity of cars during the latter part of the month, grain shippers being the chief sufferers. It is reported that grain elevators are all full of grain, and that many bitter complaints are being received in regard to the delay in obtaining cars. The shortage at Kansas City was very great during the month, affecting all classes, although hay and grain shippers appear to have suffered most. Live-stock shippers, however, and, in fact, nearly all others, could not obtain the necessary cars.

It is interesting to note, in connection with the general car shortage throughout the country, that in the Pittsburg district there has not been as yet any serious congestion of freight cars, which is very often the case at this time of the year. While only about 90 per cent of the tonnage offered at that city is being handled, there are practically no delays of any character, and the shippers and railroads appear to be working together to relieve the situation. The prompt unloading of cars by consignees has been of the greatest assistance to the railroads, enabling them to deliver additional cars as soon as received, and thereby continuing the movement after arrivals at terminals to place of unloading.

I.—COMMERCIAL MOVEMENTS AT INTERIOR CENTERS.

The territory embraced in this section extends from Minneapolis, in the Northwest, to Little Rock, in the Southwest, east as far as Buffalo, and south as far as the Ohio River. Interior traffic movements for September of succeeding years are shown by tables of live-stock receipts and shipments and comparative stocks of provisions at five packing-house centers; by tables of receipts and shipments of flour, grain, produce, and merchandise, and by trunk-line shipments of flour, grain, and provisions from Chicago. During the season of canal navigation, canal and rail traffic in grain, flour, and general merchandise at Buffalo is given under this section. Ohio River traffic is reported under Section VII—Commercial movements on rivers and canals.

WESTERN LIVE-STOCK MOVEMENT.

This movement includes receipts and shipments for September at important interior markets for three successive years. For receipts of live stock at other markets, whose operations are reported in this issue, reference should be made to the general trade movements of those sections.

The traffic taken account of in the following tables, except where otherwise specified, is coastwise traffic only, and is confined strictly to commerce between domestic ports during the month of September and nine months ending with September. Unless otherwise credited, the statistics of domestic commerce reported herewith are compiled from supplementary manifests prepared by masters of vessels reporting through the collectors of customs.

During the month of September transactions at 154 ports of receipt and 203 ports of shipment were reported. The number of vessels arriving in September was 10,706 and the clearances numbered 10,789 vessels. The registered tonnage for the month was as follows: Arrivals, 12,609,105 net tons; clearances, 12,876,049 net tons. This total does not include the tonnage of vessels engaged in trade between the United States and Canada.

SUMMARY OF DOMESTIC LAKE TRAFFIC, SEPTEMBER AND NINE MONTHS ENDING SEPTEMBER, 1904–1906.

A summary of the lake traffic for September, compared with the corresponding months in 1904 and 1905, is given in the following table. The various quantities and units of freight are reduced to their equivalents in net tons. September receipts in 1906 at all ports reporting were 10,096,514 net tons, compared with 9,146,009 net tons in September, 1905, and 8,068,859 net tons in September, 1904. III.—COMMERCIAL MOVEMENTS ON THE NORTH ATLANTIC SEABOARD.

The territory covered by these movements includes the Atlantic coast south as far as Baltimore, Md. The operations reported include the receipts and shipments of flour and grain for September at the North Atlantic ports of Boston, New York, Philadelphia, and Baltimore.

GRAIN RECEIPTS AT FIVE DOMESTIC SEAPORTS.

Below is given a comparative table of receipts of grain, including flour and meal reduced to bushels, at five seaboard markets during September and nine months ending September, 1904, 1905, and 1906. The figures are derived in every case from the reports of the commercial organizations closely identified with the grain trade at the respective localities. These totals serve to show the relative hare of each port in this branch of domestic commerce.

IV.—COASTWISE COMMERCE AT ATLANTIC AND GULF PORTS.

The scope of commercial movements represented in this section usually includes receipts and shipments of merchandise between New York and New England ports, giving the bulk of the water-borne trade of nine of these ports with New York; coastwise receipts of southern pine and eastern spruce, by cargoes, at New York from sources of origin; and coastwise and foreign shipping movements at Boston, New York, Philadelphia, Mobile, Galveston, Port Arthur, and Sabine Pass. Coastwise coal shipments from New York, Philadelphia, Baltimore, Newport News, and Norfolk are also presented. Coastwise shipments of petroleum from Texas producing territory to Atlantic and Gulf ports and coastwise phosphate shipments are given in Section VIII.

COAL SHIPMENTS BY WATER FROM NEW YORK, PHILADELPHIA, BALTIMORE, NEWPORT NEWS, NORFOLK.

Through the courtesy and cooperation of nearly all of the more prominent shippers of coal by water from the Middle Atlantic ports of New York, Philadelphia, Baltimore, Newport News, and Norfolk, to Atlantic, Gulf, and Pacific coast ports, the following figures of the coastwise coal movement have been obtained. These statistics cover probably more than 90 per cent of the shipments for the places and periods mentioned, and include both anthracite and bituminous coal. Anthracite coal is shipped principally from New York Harbor wharves. From Philadelphia shipments are primarily bituminous and secondarily anthracite. From Baltimore, Newport News, and Norfolk shipments are almost wholly bituminous. During September vessels were supplied with fuel at these five ports to the amount of 279,445 tons, and 2,169,949 tons during nine months ending September.

During September 53 collectors of customs report 556,797 tons of coal loaded on vessels for fueling purposes on the Atlantic, Gulf, and Pacific coasts. Of this total, 153,586 tons were placed on board vessels destined to domestic destinations and 403,211 tons on foreign-bound vessels. The total value of this tonnage was reported as being $1,806,318, an average of about $3.24 per ton.

V.—COMMERCIAL MOVEMENTS IN SOUTHERN TERRITORY.

The territory covered in this section includes that lying south of the Potomac and Ohio rivers and east of the Mississippi River, and that portion west of the Mississippi included in the State of Louisiana, the Indian Territory, and Texas. The characteristic traffic movements are those of cotton, lumber, naval stores, and general commodities. Phosphate shipments are reported under Section VIII.

Cotton-trade reports include the statement of the quantity of the crop brought into sight, and its disposition, during successive crop years, to the end of September. Other articles of traffic reported are the grain and rice movements at New Orleans, shipments of yellow pine from the Southwest and from Virginia and the Carolinas to destinations, and river and rail traffic at Louisville, Ky., and Little Rock, Ark. Southern river trade is given in Section VII; southern coastwise shipments, under Section IV.

SOUTHERN COTTON MOVEMENT.

According to the practice of the New Orleans Cotton Exchange, whose official figures are used, except when otherwise specified, the amount of cotton brought into sight from month to month during the season includes (1) receipts from plantations at ports; (2) receipts at the overland points of crossing on the Mississippi, Ohio, and Potomac rivers for shipment direct to northern and eastern mills, and (3) takings by southern mills. To this must be added (4) stocks left over at the end of the year at ports and interior towns. These four items together give the total commercial supply available for distribution.

VI.—COMMERCIAL MOVEMENTS ON THE PACIFIC COAST.

Traffic operations reported in this territory consist mainly of receipts from productive areas on the Pacific slope at seaboard ports of outlet, of coastwise movements between the upper and the lower Pacific coasts, and of overland shipments to the East. The operations usually reported include receipts and shipments of merchandise at San Francisco; redwood-lumber shipments from upper California; arrivals of redwood, pine, and fir at California coast points; lumber shipments from principal mills reporting in Washington; commerce at the ports of Tacoma, Seattle, and Portland, and the shipments of citrus fruit from southern California.

VII.—COMMERCIAL MOVEMENTS ON RIVERS AND CANALS.

The movements of domestic trade represented under this heading are not confined to any particular geographical division of the country. Operations on some of the leading waterways include those on the Monongahela River between Pittsburg, Pa., and Fairmont, W. Va.; the Ohio River at Davis Island dam, Bellevue, Pa., and at Louisville, Ky.; the vessel movement at Cairo, Ill., on the Ohio and the Mississippi rivers; the traffic movements on the Delaware and Chesapeake Canal, connecting the Chesapeake and Delaware bays, and similar movements on various other navigable streams about whose navigation acceptable information is periodically available. Movements through the canals of the Great Lakes will be found in Section II.

TRAFFIC ON THE MONONGAHELA RIVER.

The iron and steel products passing Lock No. 1 represent practically the output by the river. The coal passing through Lock No. 3, plus 72,925 tons mined in the first and second pools during September, 1906, makes a total coal traffic of 747,661 tons for the river, and 7,114,637 tons for the nine months ending September. Of other downstream freight 3,311 tons of miscellaneous merchandise are to be added, making a total of 750,876 net tons in September and 7,384,766 tons in nine months. Lock No. 3 represents approximately the general aggregate of down-river tonnage.

Of upstream freight that passing through Lock No. 1 represents approximately the general movement in this direction. The freight passing this point in September amounted to 129,022 tons and 1,052,914 tons in nine months.

The total freight moved in both directions, on this basis of calculation, was 879,898 net tons in September, 1906, as against 780,644 net tons in September, 1905, and 498,841 tons in September, 1904. For nine months ending with September, 1906, the total movement was 8,437,680 tons—8,198,724 tons in 1905 and 6,053,247 tons in 1904.

VESSEL MOVEMENT ON THE MISSISSIPPI AND OHIO RIVERS VIA CAIRO, ILL.

The following table is compiled from monthly reports received from Cairo, Ill., giving the number and tonnage of vessels passing or having their termini there. The tonnage of boats and barges is estimated tonnage. The tonnage of steamboats is actual.

The total through movement represents vessels passing Cairo to or from points on the Ohio, Mississippi, and other rivers. The local movement at Cairo represents vessels having Cairo as one of their termini. (The monthly reports of arrivals and clearances are made by Mr. George Parsons, trustee of Cairo trust property, who is intimately acquainted with river operations at this point.)

For the nine months ending September 30, 1906, of the vessels reported, 1,176 were loaded with coal; 461 carried lumber, logs, piling, and wood; 48 carried ties; 516 carried merchandise; 22 brick and rock; 4 carried sugar and molasses; 12 grain; 14 steel; 6 coke; 6 iron and nails, and 1 cement.

During January, 1906, the stage of water at Cairo rose from 25.62 feet on January 1 to 35.13 feet on January 31; the highest mark was 36.20 feet and the lowest 24.67 feet. VIII.—COMMERCIAL MOVEMENTS OF COAL, COKE, PETROLEUM, AND PHOSPHATE.

The series of tables following present some of the leading traffic operations in domestic coal, coke, petroleum, and phosphate. They include shipments of anthracite coal from the anthracite regions, anthracite and bituminous coal and coke traffic originating east of Pittsburg and Erie on the Pennsylvania Railroad system; coal and coke shipments over the Baltimore and Ohio Railroad, the Chesapeake and Ohio Railway, and the Southern Railway; weekly Connellsville coke output and shipments; St. Louis receipts of coal, and receipts and shipments of coal and coke at Chicago, and, to a limited extent, the phosphate movement. Petroleum statistics are included for the pipe-line territory and for the Texas territory, showing coastwise shipments from Sabine Pass and Port Arthur, Tex., to leading destinations. For coastwise coal trade generally, see Section IV; for Lake trade, Section II.

STATEMENT OF PIPE LINES IN APPALACHIAN, LIMA-INDIANA, AND MIDCONTINENTAL FIELDS.

The following table shows the business of the principal petroleum pipe lines in the Appalachian, Lima-Indiana, and Midcontinental fields. The Appalachian field includes Pennsylvania, New York, West Virginia, southeastern Ohio, Kentucky, and Tennessee. The Lima-Indiana field includes northwestern Ohio, Indiana, and a small production in Illinois. The Midcontinental field includes Kansas, Indian Territory, and Oklahoma.

The pipe lines which report no runs from wells receive their oil through other pipe lines. The regular deliveries represent deliveries to refineries and for export and do not include deliveries to other pipe lines. The runs from wells represent Appalachian oil exclusively, in all cases except three, namely: The Buckeye, which receives Appalachian crude from southeastern Ohio and Lima-Indiana crude from northwestern Ohio; the Indiana Pipe Line Company, which receives crude from Indiana and Illinois, and the Prairie Oil and Gas Company, which operates in the Midcontinental field.

Prior to August, 1906, the Buckeye pipe line reported separately its Appalachian crude, and its Lima-Indiana crude was reported jointly with that of the Indiana pipe line. Also, prior to this date, the pipe lines distinguished deliveries and net stocks of Appalachian oil from those of Lima-Indiana oil, but at present the deliveries and stocks of several of the companies reported in the following table include both kinds of crude oil.

Net stocks, often called liabilities, represent the amount of oil for which the pipe lines have receipted to producers and which they are liable for. In addition, the pipe lines hold a certain amount of sediment and surplus oil which, combined with net stocks, constitute gross stocks.

X.—CHANGES IN RAILROAD FREIGHT RATES.

Changes in railroad freight rates as presented in the following tables are obtained through the courtesy of the Interstate Commerce Commission, the auditor of that body transmitting them on the latest date which will permit of their insertion in the Summary. In this manner their publication is assured as soon after their receipt as possible, and as a rule they cover a period nearly a month later than that represented by other statements throughout this report.

The matter of deciding what changes shall be considered of enough importance to be presented is left entirely to the discretion of the Commission, all tables which they submit being published without reservation of any kind. This, however, must not be taken to indicate that all important changes are included, as such a presentation would be a practical impossibility, owing to the great number of tariffs to be examined and the short time in which to procure the rates therefrom.
